# Welcome to BAU Global

Inquisitive thinking, hard work, and a multitude of academic perspectives have been timeless principles vital to providing students with a successful education. In our 25-year history we have strived to make these criteria an essential part of our global network's philosophy and curriculum. Having recognized the importance of being a global citizen, we have institutionalized our international programs and partnerships and today we encourage our students to study at least one of their semesters abroad through BAU network affiliates or at partners of these affiliates. Through our academic partnerships with universities, research centers, think tanks, and foundations worldwide, BAU students are exposed to and equipped with the skills and knowledge needed for today's increasingly multinational and multicultural business world fulfilling the needs of both the global and domestic workplace. With the support of our talented and devoted faculty members, who have dedicated themselves to their students' educational success, and our world-class curriculum that combines classroom education with relevant extracurricular activities, internship opportunities, and best practices in the field, students at BAU Global are uniquely prepared for their future careers.

Enver YÜCEL  
President of BAU Global

# About BAU Global

The BAU Global Education Network is comprised of higher education institutions spread around the world. This international network welcomes students from across the globe to study at a number of locations. Students and graduates of BAU Global form an academic community that spans many countries on four continents: North America, Europe, Africa, and Asia. BAU Global universities offer nearly two hundred undergraduate, graduate and doctoral programs in architecture, art, business administration, communication, design, economics, education, engineering, health sciences, information technologies, law, medicine, and social sciences. BAU Global develops global citizens who are committed to values that benefit the entire world. The institutions in this network not only meet the standards set forth by the accreditation bodies in their home countries, but are also highly ranked in the disciplines they offer.

## Opportunities

### Network

Students within the BAU Global Education Network attend classes, participate in extracurricular activities, and further their development unfettered by geographic restrictions. They are free to explore all corners of the world as they grow in experience, becoming global citizens with an eye on the future.

### New Cultures & Multiple Languages

Besides the frequently used English language, which has become the common language of education, BAU Global students have the opportunity to learn languages such as Italian, German, and others by living in the countries where the BAU Global Education Network operates. Interacting with people of different nations and linguistic cultures, in their country of study, provides students with the opportunity to learn different languages and become closely acquainted with diverse cultures.

### Career

Receiving education in different countries, possessing several diplomas, having established networks around the world and the career opportunities provided by them are of capital importance for BAU Global students. BAU Global students, who have these opportunities and have been trained as successful individuals, acquire the possibility of worldwide employment and find it easier to step into their professional lives with a new perspective and world-view.

## Transboundary Education Approach from London to the World

BAU Global, which presents sustainable education models to the world in more than 150 academic programs, designs the education at its headquarters in London. BAU Global's comprehensive education strategies are planned considering the needs of the present century and the future. It sets the vision of education for all schools around the world providing education in architecture, art, business management, communication, design, economics, education, engineering, health sciences, information technology, law, medicine and social sciences.

BAU Global, which transforms London-based educational projects into global benefits, devotes its educational content to educating individuals who are competent in their fields, open to change and development, adopting the principle of lifelong learning and respecting diversity. The first steps of all educational innovations brought to the world by the BAU Global Education Network are taken in the center of London with the transformational power of education in providing global solutions to global issues.

In the era of unmanned systems, the London-based BAU Global education designs are bringing generations to play an active role in the production of these systems, which are implemented with the benefit of the community in mind. It focuses its students on acquiring 21<sup>st</sup> century skills such as creativity, problem solving, critical thinking and effective communication, which are becoming increasingly important.

BAU Global Education Network, pioneering education on 4 continents, is gaining integrity through the expertise of its schools in different locations. Scientific preparation process of students through inter-university agreements is combined with cultural experience. The learning experience of a student studying at BAU Global is enriched with new perspectives thanks to the student exchange programs and the opportunities to continue studying in another country through various agreements. Under the roof of the BAU Global Education Network, where students from different nationalities meet, cultural diversity is the source of inspiration for interdisciplinary studies. While students gain their theoretical qualifications in their schools, university-sector collaborations and professional life experience are integrated into the school process and talent is transformed into competences that are accepted and demanded in the century we live in.

Are  
you looking  
for a  
support  
to start  
a business?

#### What is BAU Hub?

BAU Hub is the headquarters of Bahcesehir University entrepreneurship ecosystem. We support innovative entrepreneurs and startups with our vast academic and commercial knowledge, network, and experience.

BAU Hub offers all kind of supports startups need such as training, mentoring, office space, network, access to capital, etc. from idea stage to scale-up phase under different programs.

#### HUB Incubator

At HUB Incubator, we work with startups ready to incorporate or already incorporated. Do you need one-to-one support in your business development, marketing, sales, HR etc.? We are ready to host your company at our incubator premises; Future Campus, Galata, or Beşiktaş.

#### BIZ Lab

Are you looking for a support to start a business? We support early-stage startups in BIZ Lab. If you have a focused startup team with a brilliant idea; let us join your journey and help you start your company! Some of the services we provide under BIZ Lab are:

- Prepare your proposal to apply seed fund support scheme of TUBITAK
- One-to-one mentoring support
- Shared office space at BAU Hub Incubation

#### EDU Lab

EDU Lab is a venture-client program where we support innovative education technology startups with the vast knowledge and experience of Bahçeşehir-Uğur Educational Institutions (BUEK). Do you have an innovative ed-tech product that BUEK can test and benefit? Apply EDU Lab!

#### BUG Lab

Are you an indie game studio looking for a program to accelerate your game production and launch? Do you need tailored support of best game developers? Would you like to engage with the indie gaming community of Istanbul? Apply BUG Lab!

# Istanbul

Bahçeşehir University

Bahçeşehir University (BAU) was founded in 1998 as a non-profit foundation university. Since then, it has constantly expanded its intellectual boundaries and maintained its commitment to providing a high-quality university education by focusing on fundamental academic disciplines. Over the past 25 years, Bahçeşehir University has established 10 undergraduate faculties, 1 graduate school, 2 vocational school, a school of foreign languages, a school of applied disciplines, a conservatory and a continuing education school.

After the university's first graduation ceremony in 2003, Bahçeşehir University moved its main campus to its current picturesque Beşiktaş location. Situated in downtown Istanbul, BAU is in and of the city, drawing its inspiration from the city's essence. Growing to four central campuses in recent years, each reflects the university's overall philosophy, which is to provide students with a nurturing environment in which students can become active and inquisitive learners, grow social and cultural awareness, acquire problem-solving and decision-making skills and develop strong ethical and moral standards.

## About Istanbul

- Enrich your social environment with Istanbul's multicultural structure.

- Get the chance to follow the world's most important cultural and art organizations closely.

- Give shape to social life through your own cultural dynamics.

- Get the important business opportunities that can determine the future route of your career.

- Istanbul, the beating heart of the Turkish economy, helps you access important business opportunities.

- Follow the R & D centers of national and global companies that produce projects for the future closely.

- Join the organizations of global companies.

- Adapt quickly to Istanbul with a dynamic and young population.

- Reach many art and entertainment events.

- Take advantage of the Istanbul's multi-cultural environment to the fullest.

MLA College

MLA College offers Bachelor's and Master's degrees, both face-to-face and distance, allowing students to gain a degree whilst maintaining a suitable work-life balance. The MLA is an award-winning provider of distance education with programmes fully validated by the University of Plymouth.

For those interested in the marine and maritime environment, sustainability, business and management, MLA College offers distance learning undergraduate and postgraduate degree qualifications in Sustainable Maritime Operations, embracing the UN Sustainable Development Goals. For marine professionals the MLA offers a suite of MSc programmes. Subjects include Engineering, Meteorology, Oceanography, Hydrography and Navigation. These programmes are predominantly aimed at employed professionals seeking professional registration and/or Chartered status.

A distance learning MBA is also available and is designed for any individual moving into, or in, a senior or strategic management role. It has been designed in collaboration with employers to ensure high quality education and training with relevance to the business community. The course is taught through distance learning, combined with a high degree of tutor support. There are opportunities to attend Residential Summer Schools, experiencing short, intensive periods of face-to-face delivery.

- Quickly adapt to your school and the city through the warm atmosphere of the campus.
- Improve your language skills in a short time with experienced teachers and friendly people of the city.

# Plymouth

Mentora Language Academy

The mission of Mentora Language Academy Plymouth is to develop students' creativity and ethical approach to contribute wisdom, compassion and leadership to a global society. Through extensive English language study, experienced teachers lead our students through a challenging and stimulating curriculum and inspire them to take responsibility for learning.

The historic city of Plymouth, "Britain's Ocean City", is known for its maritime heritage and historic Barbican district with narrow, cobbled streets. The Mayflower Steps are where the Pilgrim Fathers set sail for the New World in 1620. Mentora, being located in this wonderful city, allows students to develop not only their English language, but also live within and experience the culture. The surrounding area of Dartmoor allows students the opportunity to see rural England.

Our students enjoy personalised, high-quality, communication-based, small-group language classes in a friendly, yet professional setting. Mentora Language Academy Plymouth is committed to the highest standards of academic excellence, and ensures flexible curricula meet student needs and that our students develop the required skills for lifelong learning.

## About Plymouth

- Learn a language in a peaceful environment through the Plymouth secure structure.
- Adapt quickly to Plymouth with the city's friendly people.

- Enjoy language learning through the green fields and parks of the city.
- Spend some quality time through the city's history, a perfect bridge between past and present.
- While learning a language, take the opportunity to spend some time in Plymouth with its affordable prices.
- Enjoy a peaceful life while studying in one of the happiest cities in the country.
- Take the opportunity to make new friends from all around the world in one of the UK's major student cities.
- Don't miss the chance to invest in your career in the city where major shipping companies are located.
- Learn the language in the city where you can find an activity at anytime and anywhere.
- Improve your taste and language through the various cuisines of the world.

# Berlin

Mentora Sprachschule

Situated in the heart of multilingual Berlin, Mentora Language School combines the best scientifically certified approaches in language training. Our teaching staff is not only proficient in linguistics but has both the pedagogic methodology as well as the intercultural awareness needed to provide a sound and sophisticated language training.

Our students are taught in small groups aiming at creating a familiar atmosphere which allows our teaching staff to show consideration for the specific background and the individual needs of the course participants. Whether English or German - at Mentora Language School our students learn with and from each other. Language tandems help the participants in developing and fostering communication oriented skills.

## About Berlin

- Complete your language training in one of the Germany's most vibrant cities through the rich activities.
- With the multicultural structure of Berlin, learn by experiencing the languages you study.
- While keep learning languages, don't miss the new career opportunities in the city where long-established companies located in.
- With the historical structure of Berlin, you will have the chance to increase your cultural background while developing your language.
- With the positive atmosphere of the summer, reflect your high energy into language learning.
- Learn a new language and make new friends with the city's friendly people.

- Expand your language and your horizons in Berlin, which is home to some of the world's exclusive arts and culture events.
- Live new experiences during your stay with the active night life in Berlin.
- Complete your language training without leaving the nature and surrounded by the green fields.

# Ulaanbaatar

Mentora Language Schools

Mentora is a long established English language training school accredited by CEA and offering an academically focused, challenging and stimulating learning experience. Located in the political and historical heart of the nation, students are guaranteed to enjoy the true American experience. Mentora is a short walk from many of D.C.'s major tourist attractions. The White House is right next door, and the National Mall, where the majority of the city's museums are, is only ten minutes away.

Mentora is a member of Bahçeşehir Uğur Educational Institutions within the body of the BAU Global Education Network. Since its founding, it has constantly expanded its intellectual boundaries and maintained its commitment to provide high-quality language instruction by focusing on the implementation of best practices within discipline.

## About Washington D.C.

## Bahçeşehir College

Bahçeşehir College has been implementing innovative educational models and pioneering adoption of various educational models in Turkey. STEM+A, Personalized Teaching Model (PTM), Bilingual Education, Master 6, Programming and Robotics Education are some of the educational models pioneered Bahçeşehir College in the educational community and first implemented in Turkey by Bahçeşehir College. With innovative educational models, particularly STEM+A, Bahçeşehir College graduates multitalented, analytical and interested minded world citizens who cherish attainments of the 21<sup>st</sup> century and proficient in foreign language.

Bahçeşehir College has pioneered adoption of STEM+A educational model in Turkey which is a project-oriented model based on combination of multi-disciplines in sciences, technology, engineering, mathematics and arts taught together, and the model implemented at all campuses of the institution across Turkey starting from preschool grades. STEM+A educational model is employed to educate individuals who are capable of solving the problems of the future and who can think creatively and convert ideas into results. At STEM+A Centers featuring multi-purpose laboratories for production based education and STEM+A focused projects, students are enabled to use state-of-the-art instruments such as 3D printers, CNC lathe & turning, laser cutters, such as computerized hot wire cutting tools that are hard to come by even in universities, in order to manufacture prototypes for their projects in "Computer Assisted Drawing and Modelin", "RC Model Production Club - RCCLU", TÜBİTAK projects, patenting, utility model production classes offered within Bahçeşehir College curriculum as elective courses in all campuses of Bahçeşehir College.

Since 1994, Bahçeşehir College continues to move towards the goal of becoming a "global education brand" and to graduate generations who know no limits on success and who will make a difference in our future world, building on its strong academic program, innovation vision and mission to ensure access of greater number of young minds to higher quality education.

Uğur Schools

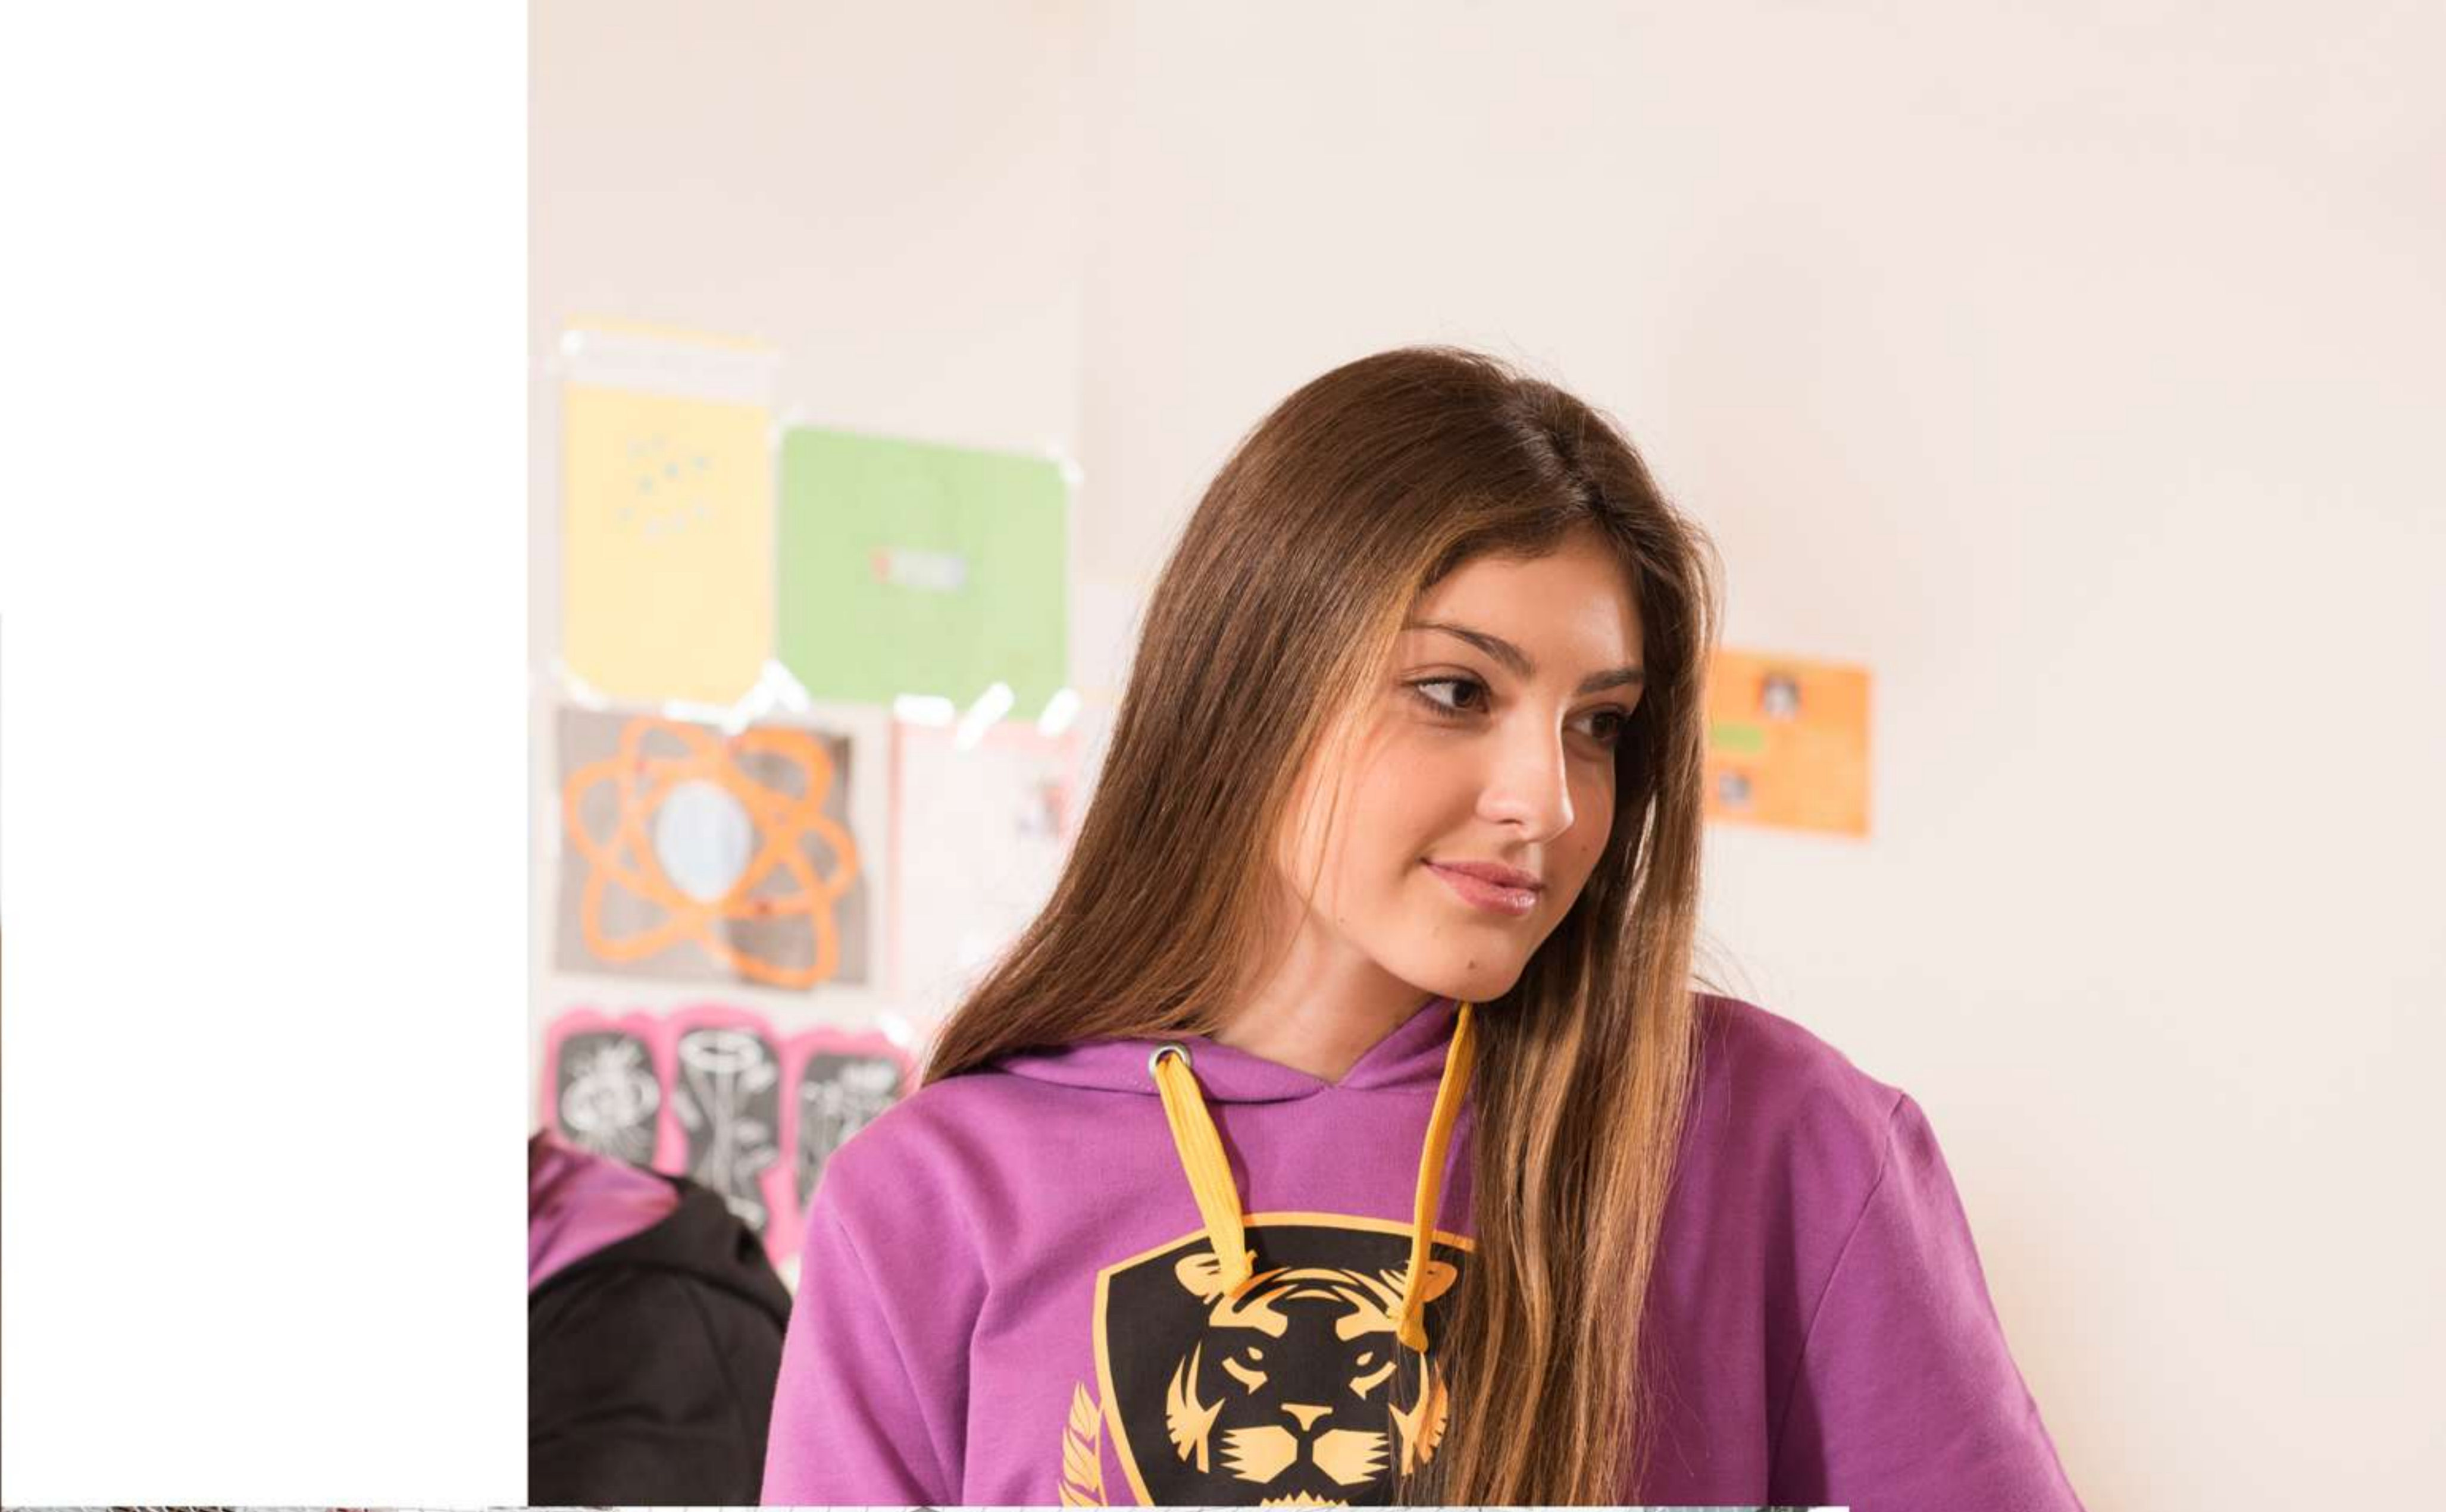

Uğur Schools, established in 1968, is a comprehensive k12 private school chain in Turkey. The school operates to provide quality education to prepare students for next age and upper grade level. In its student friendly premises and through its corporate structure, Uğur Schools equip students with academic, social, emotional and physical competencies.

In addition to the Turkish National Curriculum, experienced and dedicated teachers, with the support of academicians, develop and implement contemporary approaches and curriculums like earlySTEM, STEM, coding, robotics, co & extracurricular activities. The institution fosters national and international values, beliefs, attitudes, skills and competencies for a better world.

Intensive English Language teaching from kindergarten to the last year of high school is conducted in Uğur Schools. In foreign language education, written and online, national and international materials are incorporated. Both face-to-face and online learning opportunities are offered. International excursions, exchange programs and summer schools abroad, reinforce students to have a wider global vision and notion of global citizenship.

The centralized curriculum and implementations provide equal opportunity for students all around the country to reach the quality education they deserve. Through individualized instruction and proper guidance and counselling services, experienced teachers provide appropriate education and high-standard-support to prepare students for centralized placement tests. The institutions' curriculum is designed and implemented in a way that no other support is necessary for centralized exams.
